### Descriptive Summary

**Title:** Richard Phillips Feynman papers,

**Date (inclusive):** 1933-1988

**Collection number:** Consult repository

**Creator:** Feynman, Richard Phillips, 1918-1988

**Extent:** 39 linear feet

**Repository:** California Institute of Technology. Archives.

Pasadena, California 91125

**Abstract:** This collection documents the career of Nobel Prize winner Richard Phillips Feynman (1918-1988). It contains correspondence, biographical materials, course and lecture notes, speeches, manuscripts, publications, and technical notes relating to his work in quantum electrodynamics. Feynman served as Richard Chace Tolman Professor of Theoretical Physics at the California Institute of Technology from 1951 until his death.

**Language:** English.

#### Access

The collection is open for research. Researchers must apply in writing for access.

#### Publication Rights

Copyright may not have been assigned to the California Institute of Technology Archives. All requests for permission to publish or quote from manuscripts must be submitted in writing to the Head of the Archives. Permission for publication is given on behalf of the California Institute of Technology Archives as the owner of the physical items and is not intended to include or imply permission of the copyright holder, which must also be obtained by the reader.

#### Preferred Citation

---

[Identification of item, box and file number], Papers of Richard Phillips Feynman. Archives, California Institute of Technology.

### **Acquisition Information**

The Papers were gifted to Caltech by Richard Feynman and Gweneth Feynman in two main installments, beginning in 1968. The first group of papers, now boxes 1-20 of the collection, was donated by Feynman himself in 1968 and added to from time to time during his lifetime. It contains materials dating from circa 1933 to 1970. The second group, comprising just under three-fourths of the whole collection, occupies boxes 21-90. It was given to Caltech by Feynman's widow Gweneth early in 1989. Group 2 contains papers primarily from the 1970s and 1980s, although some older material is present. Supplements since 1994 occupy three boxes and have come from various donors outside the Feynman family.

### **Processing History**

This collection was processed by Charlotte E. Erwin, Carol Finerman, and David A. Valone and completed on July 1, 1993. The finding aid was updated in September 2002.

### **Biography**

Physicist Richard Feynman won his scientific renown through the development of quantum electrodynamics, or QED, a theory describing the interaction of particles and atoms in radiation fields. As a part of this work he invented what came to be known as "Feynman Diagrams," visual representations of space-time particle interactions. For this work he was awarded the Nobel Prize in physics, together with J. Schwinger and S. I. Tomonaga, in 1965. Later in his life Feynman became a prominent public figure through his association with the investigation of the space shuttle Challenger explosion and the publication of two best-selling books of personal recollections.

Feynman was born in the borough of Queens in New York City on May 11, 1918. He grew up and attended high school in Far Rockaway, New York. In 1939, he received his BS degree in physics from the Massachusetts Institute of Technology. He then attended Princeton University as a Proctor Fellow from 1940 to 1942, where he began his investigation of quantum electrodynamics under the supervision of J. A. Wheeler. He was awarded his PhD in 1942 for his thesis on the least action principle.

While still at Princeton, Feynman was recruited for the atomic bomb project. He was transferred to Los Alamos in 1942, where he headed a team undertaking complicated calculations using very primitive computers. While at Los Alamos, Feynman became good friends with Hans Bethe, who at the end of the war secured a position for Feynman as an associate professor of physics at Cornell. Feynman remained at Cornell from 1945 to 1951. During this time he formalized his theory of quantum electrodynamics and began to publish his results. He also participated in the Shelter Island Conference of 1947, which helped to determine the course of American physics in the atomic age. At this conference he introduced his theory of QED to the leading American physicists.

In 1951, Feynman accepted an offer to become the Richard Chace Tolman Professor of Theoretical Physics at the California Institute of Technology, a position he filled until his death. While at Caltech Feynman continued his work at the leading edge of theoretical physics, making important contributions to the study of liquid helium, particle physics, and later quantum chromodynamics. He also began his distinguished career as a teacher and lecturer. In 1961 and 1962 he delivered to Caltech's freshmen the introductory lectures that were later published as *The Feynman Lectures on Physics*.

In 1986, Feynman was asked to serve on the Presidential Commission investigating the space shuttle Challenger accident. In a dramatic fashion, Feynman publicly demonstrated the inelasticity of the shuttle's O-rings at near freezing temperatures, a leading cause of the disaster. He also contributed an extended appendix to the Committee's report, highlighting the technical and administrative deficiencies of the National Aeronautics and Space Administration's space program.

Feynman's many interests outside of science, such as his fondness for codes and safecracking, his bongo drums, his theatrical appearances, his artwork, plus his experiments in out-of-body experiences, are well documented in his autobiographies, as well as in his papers at Caltech.

Feynman continued his scientific work and his lecturing activities up until his death on February 15, 1988, after a long battle with a rare form of cancer.

### **Scope and Content of Collection**

The working papers, correspondence, manuscripts and related materials of Richard Phillips Feynman (1918-1988) form the collection known as the Feynman Papers in the California Institute of Technology Archives. Feynman was the Richard Chace Tolman Professor of Theoretical Physics at Caltech from 1951 to 1988.

The Papers were gifted to Caltech by Richard Feynman and Gweneth Feynman in two main installments, beginning in 1968. Caltech has title to the Papers themselves, while the Feynman heirs retain literary and publication rights. The Feynman Lectures on Physics and the Lectures on Gravitation form an exception, in that Caltech is the copyright holder in these

---

publications.

The first group of papers, now boxes 1-20 of the collection, was donated by Feynman himself in 1968 and added to from time to time during his lifetime. It contains materials dating from circa 1933 to 1970. The second group, comprising just under three-fourths of the whole collection, occupies boxes 21-90. It was given to Caltech by Feynman's widow Gweneth early in 1989. Group 2 contains papers primarily from the 1970s and 1980s, although some older material is present.

The two groups of papers have been kept separate, although box numbering is continuous throughout the collection. The guide to the collection is in two parts, and researchers must expect to consult both parts. At the time the second group of papers was processed, an effort was made to create an arrangement parallel to that of group 1. However, the different content and larger scope of group 2 eventually resulted in a somewhat different scheme.

#### **Correspondence:**

The Feynman collection contains a large amount of both incoming and outgoing correspondence. Feynman's scientific contacts include many of the greatest names in twentieth-century physics: Hans Bethe, Niels Bohr, Enrico Fermi, Stephen Hawking, Werner Heisenberg, J. Robert Oppenheimer, Hideki Yukawa--to name only a few. In Group 1, correspondence has been spread over four sections: correspondence (largely with individual colleagues), miscellaneous or general correspondence, publication correspondence, and, in the biographical section, a small number of personal letters.

For Group 2, an attempt was made to pull both personal, general, and publication correspondence into one main section, Section I. However, when letters demonstrated both intellectual and physical links with other documents, their original contextual relationships were maintained. Thus, publication correspondence will be found both in Section I and in Section VI. Fan mail surrounding Feynman's television appearances, his two autobiographies, and his Nobel Prize has been placed in Section II, Biographical, as has other correspondence relating to his business and consulting activities documented there.

#### **Course and Lecture Notes:**

Feynman's lecture courses at institutions in Southern California other than Caltech, and even outside the U.S., are represented in Group 2. Of special interest are the courses Feynman gave, in addition to those he attended, at Hughes Aircraft Company, and the sets of lectures that were later published as *Statistical Mechanics* and *QED* (originally the Mautner Lectures, which were in turn predated by the Robb Lectures, first delivered at the University of Auckland, New Zealand). Material pertaining to the publication of these lecture series is found in Group 2 correspondence under the respective publishers.

#### **Talks, Speeches, Conferences:**

In this category are those lectures delivered for a special occasion or purpose, usually as single lectures, but sometimes as a series, and in both formal and informal settings. This category overlaps somewhat with Course Notes and Lectures. In Group 1, these materials are to be found under Professional Organizations and Meetings (Section III) and Manuscripts (Section V). In Group 2, they are arranged under Section V in chronological order, when dated, and in a subsection of undated talks. Folders in this category contain a wide variety of talk-related documents, from holograph notes to correspondence to slides, figures, or transparencies.

#### **Publications:**

Group 1 contains a small section of publication correspondence (Group 1, Section IV), mostly pertaining to Feynman's book or monograph publishers; in Group 2, similar correspondence has been placed in the main correspondence section (Group 2, Section I). Group 2's Section VI lists Feynman's publications by title in chronological order. Folders contain a variety of material, from holograph notes to correspondence to proofs and prints. Researchers should note that formal reprints have been grouped at the end of Group 2, in Section IX.

#### **Working Notes and Calculations:**

The vast majority of Feynman's working notes are located in Group 2. A representative sample from his early years appears in Group 1, Section V. Of special interest in this group are notebooks from his student days, beginning ca 1933. The notes in Group 2 capture the breadth and depth of Feynman's thought, as well as reflecting many aspects of his personality. They cover a wide range of subjects, from quantum electrodynamics and later quantum chromodynamics to biology and computers. The notes also reflect Feynman's working style. They are sometimes carefully organized into notebooks that were rigorously dated, such as the binders dated between 1966 and 1987 at the beginning of Group 2, Section VII. Unfortunately for researchers, these are the exception. The great mass of Feynman's working notes are scattered on miscellaneous sheets of papers, envelopes, placemats, and seemingly whatever else was at hand when thoughts struck him. Feynman occasionally took time to organize these into a system for files, although only a small fraction of his notes found their way into such a system. The great majority was left in a scattered condition and grouped during the processing of the papers as well as possible by subject matter. Many miscellaneous papers remain.

#### **Work of Others:**

---

Feynman officially maintained neutrality on the work of his contemporaries, but informal commentaries in the form of notes and marginal glosses on the work of others abound in his papers. A small segment of such materials can be found in Group 1, Section V. A large amount of work by others, both with and without Feynman's commentary, forms Group 2's Section VIII. A preponderance of material on computers dictated an arrangement in which computer-related projects are categorized separately. Individuals whose work is strongly represented--largely Caltech colleagues, students, or collaborators--are listed singly; otherwise materials have been listed by subject.

**Note on use of Guide:**

In writing the guide to the collection, the archivists have observed certain conventions, particularly in the area of manuscript description. Square brackets ([ ]) are used to mark editorial insertions, such as titles created by the archivist which are not derived directly from the manuscripts themselves. Brackets are also used to signify unnumbered pages in a manuscript.

**Indexing Terms**

The following terms have been used to index the description of this collection.

**Physicists**

Bethe, Hans Albrecht, 1906-

Bohr, Niels Henrik David, 1885-1962

Fermi, Enrico, 1901-1954

Hawking, Stephen W., 1942-

Heisenberg, Werner, 1901-1976

Oppenheimer, J. Robert, 1904-1967

**Subjects**

Computers

Gravitation--Research

Particles (Nuclear physics)

Physics--Study and teaching

Quantum chromodynamics

Quantum electrodynamics

Quantum theory

Space shuttles--Accidents--Investigation--United States

Challenger (Space shuttle)

**Corporations**

California Institute of Technology

**Genres and Forms of Materials**

Calculations

Lecture notes

Manuscripts

Notebooks

Technical notes

**Related Collections**

Researchers should also consult the Caltech Archives' Historical Files, which contain much miscellaneous material on Richard Feynman acquired from many sources. Similarly the Photo Archives offer a selection of images, obtained in a similar way. The Audio and Video Collections contain substantial Feynman material; researchers should consult the specific index.

Manuscript collections at Caltech which contain materials of particular relevance to Feynman include the Papers of Robert Leighton and the Caltech course lecture notes by Bruce H. Morgan.

## Section V: Talks, Speeches, Conferences

- Part A: Dated talks**
- Box 49, Folder 1      **The Value of Science NAS Meeting, Caltech, 1955 Nov 2-4**  
Holograph notes, 1,1-4 leaves; proof, 1 p
- Box 49, Folder 2      **Conflict of Science and Religion [ca 1956]**  
Holograph notes, [5] leaves; proofs, 2 pp
- Box 49, Folder 3      **Theoretical Ideas Used in Analyzing Strange Particles Feynman and Gell-Mann, United Nations Talk [1960s]**  
Typescript (carbon)
- Box 49, Folder 4      **Seeking New Laws (Messenger Lecture #3) Cornell, 1964 Nov**  
Holograph notes, [3] leaves
- Box 49, Folder 5      **My Experiences with Quantum Electrodynamics Caltech Physics Colloquium, 1965 Dec 2**  
Typescript, 33 leaves (incomplete, pp. 10, 14, 17 missing)
- Box 49, Folder 6      **[Talk, CERN] 1965 Dec 17**  
Typescript; audio tape
- Box 49,  
Folder Folders  
7-10      **What is Science? National Science Teachers Association, New York, 1966 April 2**
- (folder 7) Correspondence, general 1965-67; (folder 8) correspondence, *The Physics Teacher* 1967-69; (folder 9) typescript (photocopy), with holograph corrections, 32 leaves; (folder 10) Ed Hutchings's typescript (photocopy), 32 leaves
- Box 49,  
Folder Folders  
11-12      **The Principles of Relativistic Quantum Mechanics American Physical Society, Washington, 1966 April**
- (folder 11) Correspondence, general 1965-67; (folder 12) notes (photocopy) by J. Ashkin; correspondence 1966-67
- Box 49, Folder 13      **The Application of Mathematics to Mathematics Mathematical Society of America, Eugene, 1969 Aug**  
Holograph notes, [2] leaves; abstract, correspondence
- Box 49,  
Folder Folders  
14-15      **The Behavior of Hadron Collisions at Extreme Energies Third International Conference of High Energy Collisions, Stony Brook, 1969 Sept 5-6**
- (folder 14) Holograph, 1-10, 10a, 11-19 leaves; typescripts (one photocopy); (folder 15) publication correspondence 1969-70
- Box 49, Folder 16      **[Lecture, Oersted Medal] American Association of Physics Teachers, 1972 Feb 1**  
Correspondence 1971-72, 1980-81; typescript (photocopy), ill.
- Box 49,  
Folder Folders  
17-18      **What Neutrinos Can Tell Us About Partons Neutrino Conference, Balatonfüred (Hungary), 1972 June 11-17**
- (folder 17) Correspondence 1972; (folder 18) holograph, [i], 1-2, 2a, 3-7, 7a-c, 8-21, [3] ill. leaves; typescripts (one photocopy)
- Box 49, Folder 19      **Final State Hadrons from Deep Inelastic Collisions XVI International Conference on High Energy Physics, Batavia, 1972 Sept 6-13**  
Correspondence 1972; typescript
- Box 49, Folder 20      **[Talk, particles] Caltech, Ramo Auditorium, [1973]**  
Typescript
- Box 50, Folder 1      **[Talk on quarks] 1973 Jan 11**  
Holograph notes, III leaves
- Box 50, Folder 2      **The Internal Structure of the Proton Museum of Science and Industry, 1973 May 3, and Lawrence Berkeley Laboratory, 1973 May 10**  
Holograph notes, [1] leaf
- Box 50, Folder 3      **Partons Fifth Hawaii Topical Conference in Elementary Particle Physics, Honolulu, 1973 Aug 7-20**  
Correspondence and documents 1972-74
- Box 50,

**Section VIII: Work Of Others**

	<b>Part A: Individuals, general</b>
Box 78, Folder 1	<b>Alfaro, Fubini and Furlan 1979, n.d.</b>
	<b>Preprints re Gravity</b>
Box 78, Folder 2	<b>Anderson, Orson L. 1965, n.d.</b>
	<b>Notes, photocopies, reprints</b>
Box 78, Folder 3	<b>Anderson, P. W. n.d.</b>
	<b>Preprint</b>
Box 78, Folder 4	<b>Barut, A. O. et al. 1984</b>
	<b>Reprint (photocopy) with Feynman's annotations re Dirac electron</b>
Box 78, Folder 5	<b>Bjorken, J. D. and Eguchi, T. 1963, 1976, 1983</b>
	<b>Reprints (photocopies), correspondence (J. Zmuidzinas)</b>

---

---

Box 78, Folder 6	<b>Blackmarr, Philip ca 1978-79</b> <b>Drawings</b>
Box 78, Folder 7	<b>Bonic, Robert 1974</b> <b>Typescript (photocopy), correspondence</b>
Box 78, Folder 8	<b>Botelho, Luiz C. L. n.d.</b> <b>Preprint</b>
Box 78, Folder 9	<b>Carlitz, R. and Kislinger, M. 1969</b> <b>Preprint</b>
Box 78, Folder 10	<b>Coleman, Sidney 1975-1977</b> <b>Lecture transcripts (photocopies)</b>
Box 78, Folder 11	<b>Dessler, A. J. 1961</b> <b>Reprint with Feynman's annotations and photo re cosmic radiation</b>
Box 78, Folder 12	<b>Dimotakis, P. E. 1984</b> <b>Reprints</b>
Box 78, Folder 13	<b>Dirac, P. A. M. 1931</b> <b>Article (photocopy)</b>
Box 78, Folder 14	<b>DuMond, Jesse 1960</b> <b>Reprint</b>
Box 78, Folder 15	<b>Einstein, Podolsky and Rosen 1935</b> <b>Article (photocopy)</b>
Box 78, Folder 16	<b>Fadeev, L. et al. 1967, 1970-71</b> <b>Articles (photocopies)</b>
Box 78, Folder 17	<b>Field, R. D. n.d.</b> <b>[Notebook:] Quark/Proton/Model RPF &amp; RDF</b>
Box 78, Folder 18	<b>Field, R. D. 1974-75</b> <b>Notes by Field and Feynman, preprint and reprint (photocopies) re <math>\eta</math>-<math>\eta'</math> mixing</b>
Box 78, Folder 19	<b>Field, R. D. 1981</b> <b>Preprint</b>
Box 78, Folder Folders 20-21	<b>Field, R. D. Applications of Perturbative QCD (book MS) 1987</b>  <b>(folder 20) Typescript of Chaps. 1-3 with Feynman's annotations, correspondence; (folder 21) typescript of Chaps. 4-5 with Feynman's annotations</b>
Box 79, Folder 1	<b>Field, R. D. Applications of Perturbative QCD (book MS) 1987</b> <b>Typescript of Chaps. 6-7, Appendix, with Feynman's annotations</b>
Box 79, Folder 2	<b>Field, R. D. 1978</b> <b>Preprint</b>
Box 79, Folder 3	<b>Fox, Geoffrey 1983, n.d.</b> <b>Preprints with extensive annotations by Feynman, including letter to "Mr. Flynn"</b>
Box 79, Folder 4	<b>Fradkin, E. S. et al. 1976-78</b> <b>Preprints, reprints</b>
Box 79, Folder 5	<b>Frey, Alexander n.d.</b> <b>Preprint re Hypercube</b>
Box 79, Folder 6	<b>Fubini, S. et al. 1985 See also: Alfaro</b> <b>Preprint, reprints (photocopies) re stochastics</b>
Box 79, Folder 7	<b>Gell-Mann, Polyakov et al. 1975-76, n.d.</b> <b>Typescript, reprint (photocopies) with Feynman's notes and annotations</b>
Box 79, Folder 8	<b>Goodstein, D. 1975, n.d.</b> <b>Articles (photocopies) re superfluid helium 3</b>
Box 79, Folder 9	<b>Groenewold, H. J. 1946-1949</b> <b>Reprints</b>
Box 79, Folder 10	<b>Hopfield, John 1982-83, n.d.</b> <b>Preprints (photocopies), reprint</b>
Box 79, Folder 11	<b>Jackiw, Roman et al. 1976-83</b>

---

---

	<b>Preprints, reprint, correspondence re Yang-Mills quantum theory, gauge theories</b>
Box 79, Folder 12	<b>Julesz, Bela et al. 1974-81</b>
	<b>Reprints, correspondence re: biological cybernetics</b>
Box 80, Folder 1	<b>Kikuchi, Ryoichi et al. 1951, 1967, 1974</b>
	<b>Reprints</b>
Box 80, Folder 2	<b>Kosterlitz, J. and Thouless, D. J. 1972-73</b>
	<b>Correspondence, reprints</b>
Box 80, Folder 3	<b>LaBerge, Stephen et al. 1980-81</b>
	<b>Preprints, reprints (some photocopy) re lucid dreaming</b>
Box 80, Folder 4	<b>Langmuir, I. 1968</b>
	<b>Article (photocopy), annotated</b>
Box 80, Folder 5	<b>LaRue, George et al. 1977-79</b>
	<b>Reprints (photocopies) with Feynman's annotations, dissertation, envelope</b>
Box 80, Folder 6	<b>Mermin, N. D. 1981</b>
	<b>Article (photocopy); Feynman's notes, [1] leaf</b>
Box 80, Folder 7	<b>Motin, Harry Chris n.d.</b>
	<b>Typescript notes with Feynman's annotations; Feynman's notes, [1] leaf</b>
Box 80, Folder 8	<b>Nemec, Donald 1976</b>
	<b>Typescript report re psychic phenomena</b>
Box 80, Folder 9	<b>Platzman, P. et al. 1979</b>
	<b>Preprints, reprint</b>
Box 80, Folder 10	<b>Poggio, T. et al. 1976-83</b>
	<b>Reprints (some photocopy); Feynman's notes, [1] leaf re biological cybernetics</b>
Box 80, Folder 11	<b>Poltzer, H. David 1974</b>
	<b>Reprint (photocopy) with Feynman's annotations (138v)</b>
Box 80, Folder 12	<b>Poltzer, H. David 1977</b>
	<b>Preprint</b>
Box 80, Folder 13	<b>Polyakov, A. M. and Wiegman, P. B. ca 1983</b>
	<b>Preprint with Feynman's annotations re Goldstone bosons</b>
	<b>Polyakov, A. M. See also: Gell-Mann</b>
Box 80, Folder 14	<b>Privman, V. et al. ca 1985</b>
	<b>Preprint</b>
	<b>Reines, F. See: Vogel, P.</b>
